

**The Terraces's partnership with Renee Marchant brings personalized dental hygiene care to our residents.**

Healthy teeth and gums are important for all of us and essential for the medically compromised. Oral diseases can be hidden to the untrained eye and exacerbate other medical conditions such as diabetes, heart disease and lung disease. Seniors can become more prone to oral diseases that may lead to pain, altered communication, malnutrition, further susceptibility to infectious disease and diminished quality of life. Dental hygiene services are available to all of our residents, whether they have all of their teeth or full dentures.

### **Renée Marchant, RDHAP**
